GET TO KNOW US

500kW power of the sun

PHOTOVOLTAIC SOLUTIONS

Our company develops renewable energy projects, especially photovoltaic power plants in the European Union. We are able to provide technical advices during the design and construction supervision during construction of your photovoltaic power plant. We realize construction of photovoltaic power plants, we cooperate with accredited laboratories and we are capable to provide accredited tests.

sREC

Reduce your carbon footprint and buy your Renewable Energy Certificate from a trusted source! Every single solar plant produces enough energy to supply over 250 households for a year.

design

We provide you with design expertise, technical advise and legal consulting services during the pre-construction phase.

construct

We provide construction supervision with a wide range of technical inspection services during the construction of your photovoltaic power plant.
